Projects

Anchor

A PROGRESSION BASED HABIT TRACKING APPLICATION | *January 2025*

Tech Stack: React, Redux, Flask, Alembic, SQLAlchemy, PostgreSQL

- Engineered RESTful API endpoints with Flask blueprints and JWT authentication middleware, enabling secure user-specific habit tracking and data protection.
- Implemented SQLAlchemy relationships with cascade delete rules and eager loading to maintain data integrity between habits, entries, and user statistics.
- Developed custom Redux reducers and thunk middleware to manage complex state updates for the progression system, ensuring consistent XP calculations across components.
- Created modular React components with custom hooks to handle real-time stat updates, separating UI logic from state management for improved maintainability.

LeadSender

SEND OFFERS TO THOUSANDS AUTOMATICALLY | *September 2025*

Tech Stack: React, Redux, Flask, Alembic, SQLAlchemy, PostgreSQL

- Built a full-stack email automation app parsing spreadsheets and sending personalized emails at scale using React, Next.js, Express, and SendGrid
 - Implemented intelligent data parsing with header normalization and Propwire export auto-detection, reducing manual processing time
 - Developed a template editor with real-time preview and validation, enabling non-technical users to manage bulk email campaigns
-

Work Experience

Technical Support Consultant

Piedmont Shopper | *Danville, Virginia* | *Jan. 2018 - Jan. 2023*

- Performed setup and continuous troubleshooting on computer hardware and software for employees.
- Engaged in network maintenance regularly by creating backups and monitoring traffic.
- Configured company server for SSH and FTP access, allowing employees to access files anywhere securely.

Blackjack Dealer

Caesars Entertainment, Inc. | *Danville, Virginia* | *Jul. 2023 - Nov. 2023*

- Maintained and carried out blackjack games in a fast-paced environment by utilizing quick math and multitasking.
 - Secured and managed a rack of cheques at all times and handled large quantities of cash.
 - Positively interacted with customers no matter their behavior towards me or other people by following standard procedures.
-

Education

App Academy

CERTIFICATE OF COMPLETION | *San Francisco, California* | *August 2024 - January 2025*

- Completed intensive 1000+ hour software engineering program with an acceptance rate lower than 8 percent.
- Built and deployed multiple full-stack applications while learning industry best practices and agile methodologies.
- Collaborated with diverse teams using Git workflow and version control in a fast-paced development environment.
